

# Interagency Data Exchange Agreement (IDEA)

Joy Bonaguro

Chief Data Officer | State of California

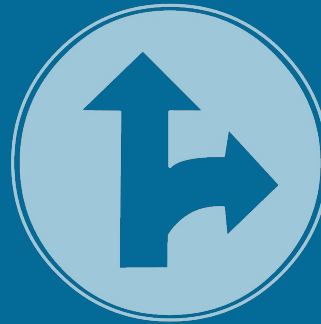

# Statewide Data Goals

*Equipping ourselves to navigate the data landscape*

**Build the data roads**  
*streamline data access*

**Craft the rules of the road**  
*improve data management and  
governance*

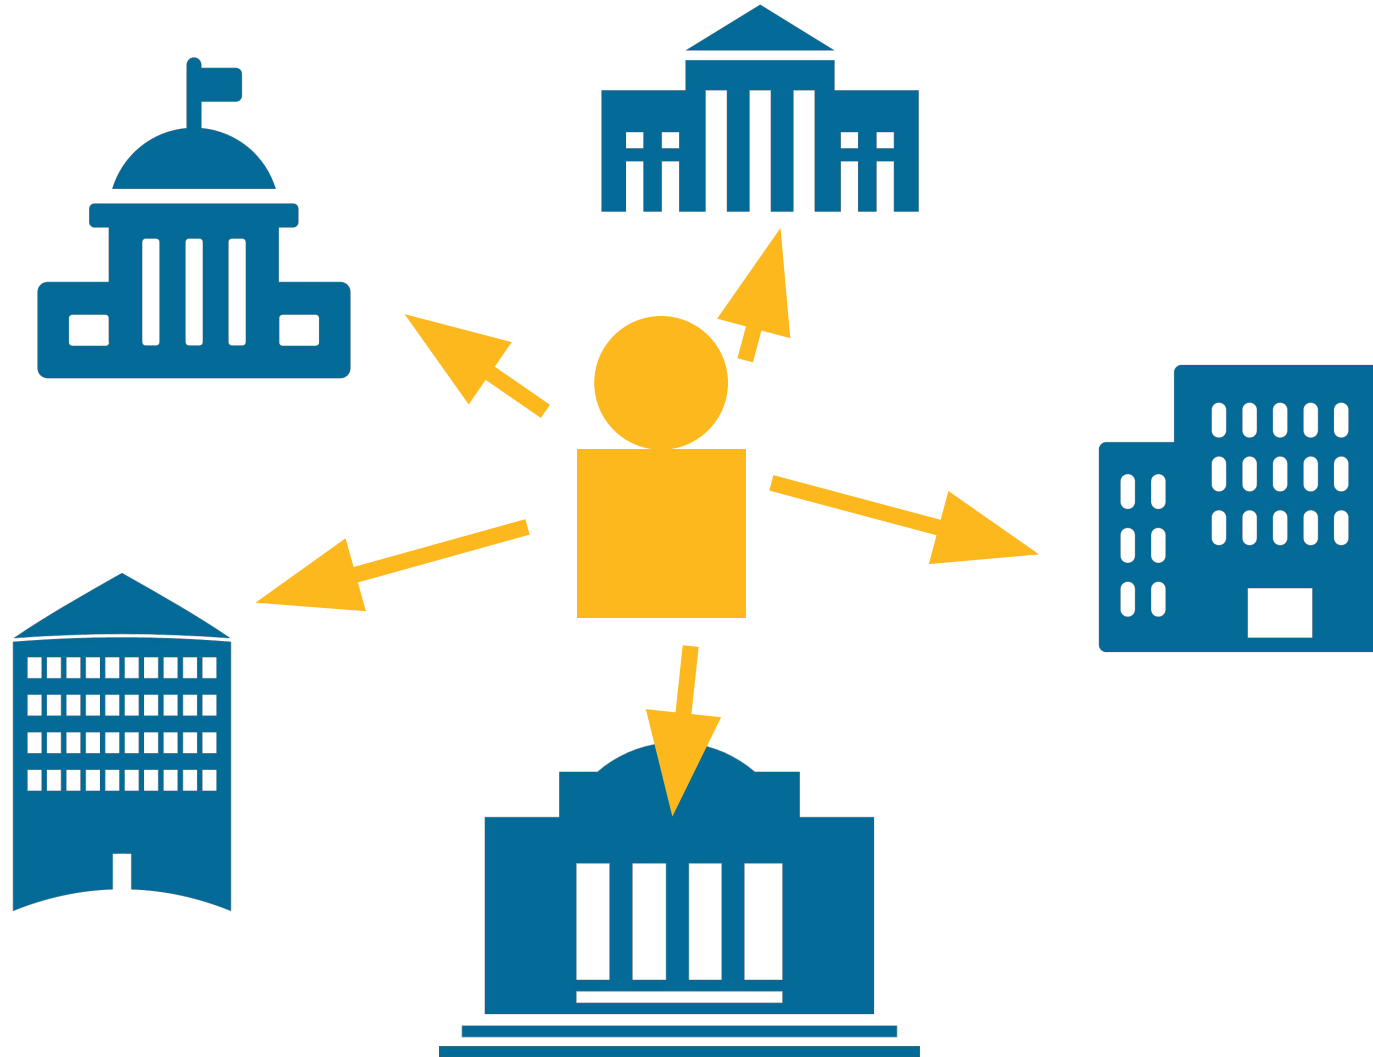

**Boost the drivers**  
*spur data use and ability*

Why data  
exchange  
matters

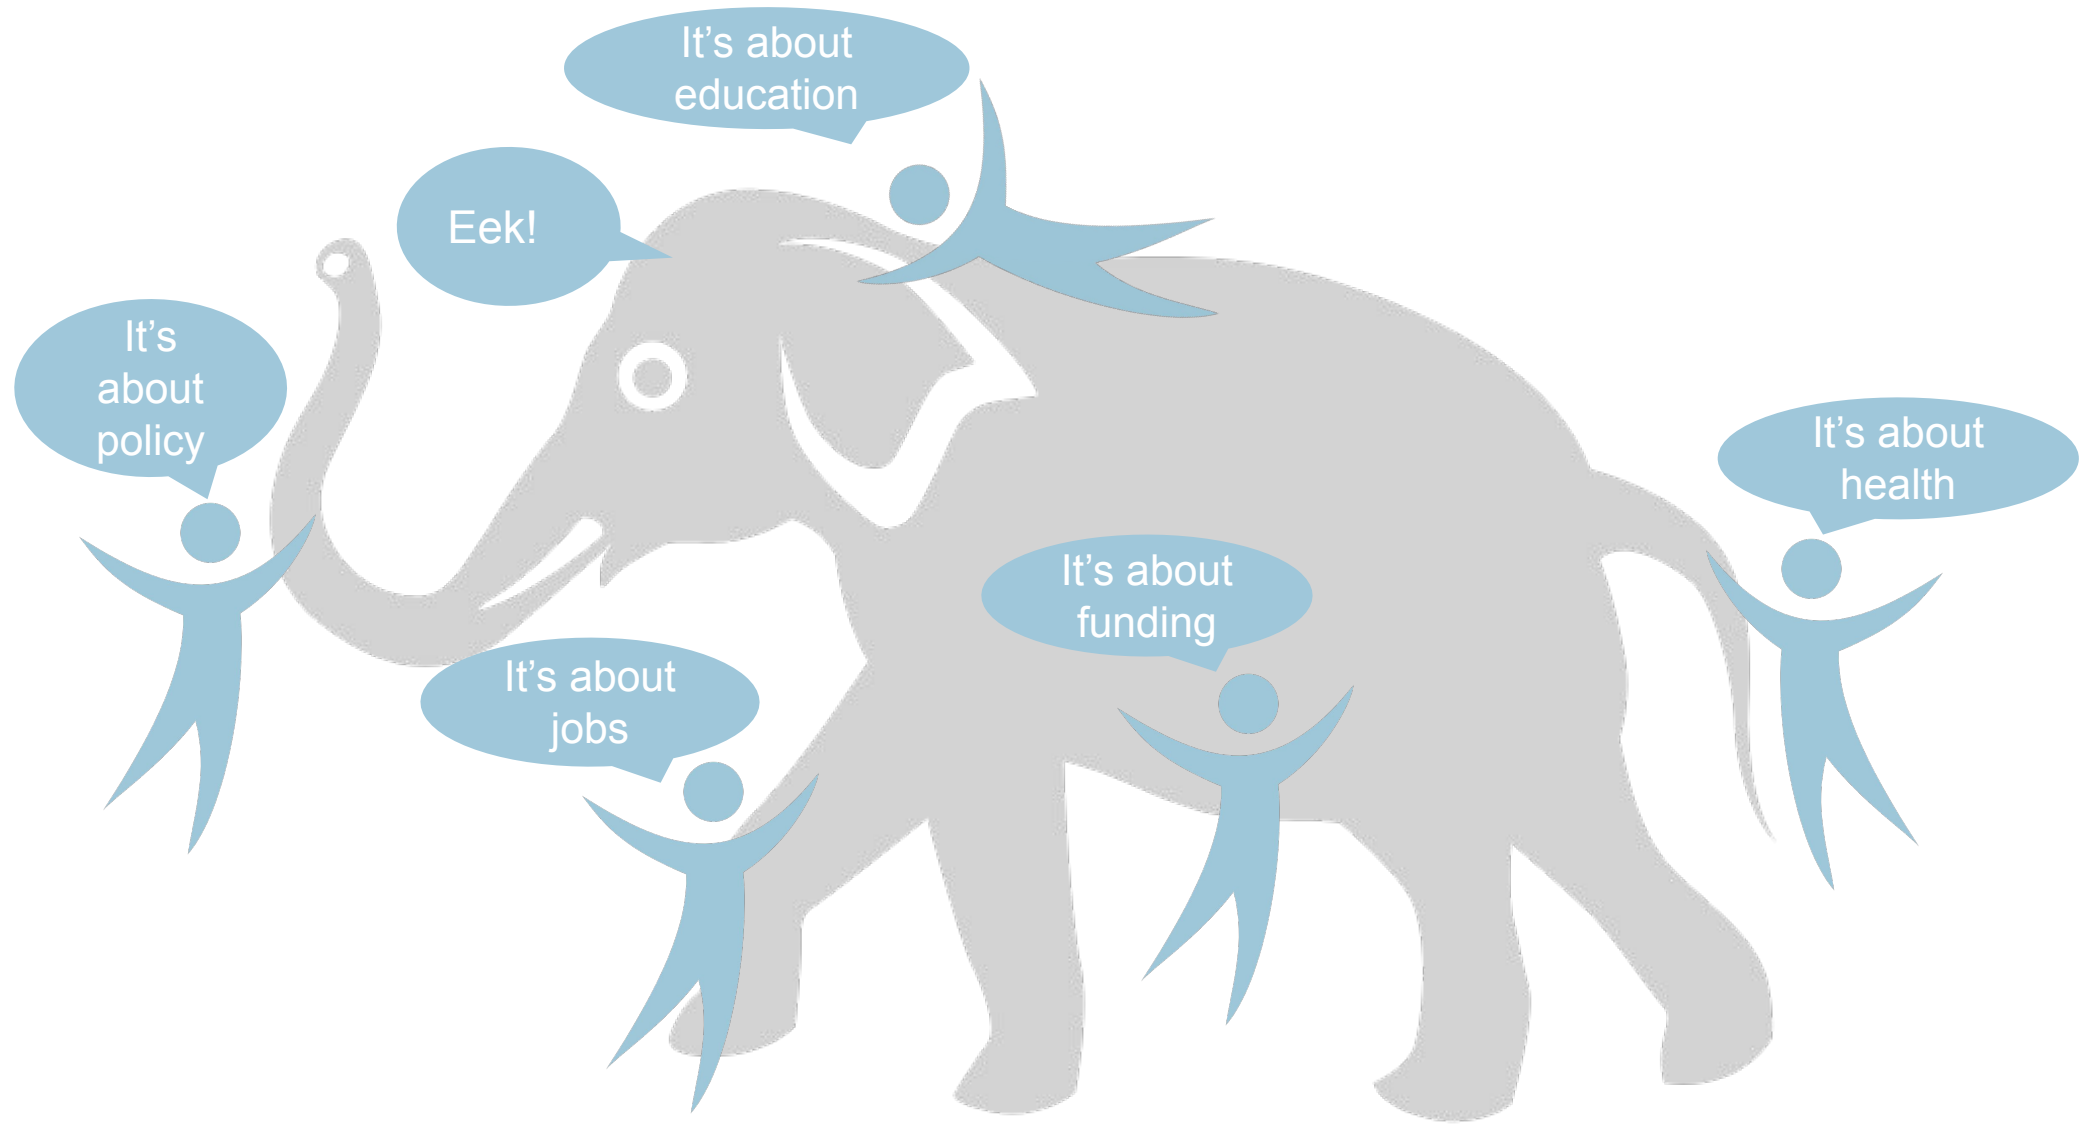

# Californians touch many of our services

Our data is housed in silos

# If you only see part of the problem, you may solve for the wrong thing

..California was **one of only eight states** [without] a “longitudinal” data system...**only by linking the systems**, tracking students’ student outcomes as they move through school, will legislators, educators, researchers and the public **begin to answer fundamental policy questions...**

California finally to move ahead

## California finally to move ahead with 'cradle to career' data system

*Legislature lays out steps, timetable for linking preschool to workforce education data.*

PHOTO BY HELLOQUENCE ON UNSPLASH

*This article was updated June 25 with final votes of passage by the Senate and Assembly.*

With \$10 million in funding, an ambitious timeline and a champion in Gov. Gavin Newsom behind it, the Legislature this week passed legislation for a statewide education data system that will follow children from infancy through the workplace.

In-depth. Reliable. Trustworthy.

CALIFORNIA LEGISLATURE

# Newsom's 'State of the State' 2020, annotated

BY CALMATTERS STAFF  
FEBRUARY 19, 2020

Gov. Gavin Newsom delivers the 2020 State of the State address. Photo by Anne Wernikoff for CalMatters

...as a State, we must do everything we can to **ensure no Californian is homeless**....In order to track progress, we're committed to **establishing a unified homelessness data system** to capture accurate, local information. Because you all know this, you can't manage what you don't measure.

# Also covers other sensitive data

Information/cyber security

Critical assets/infrastructure

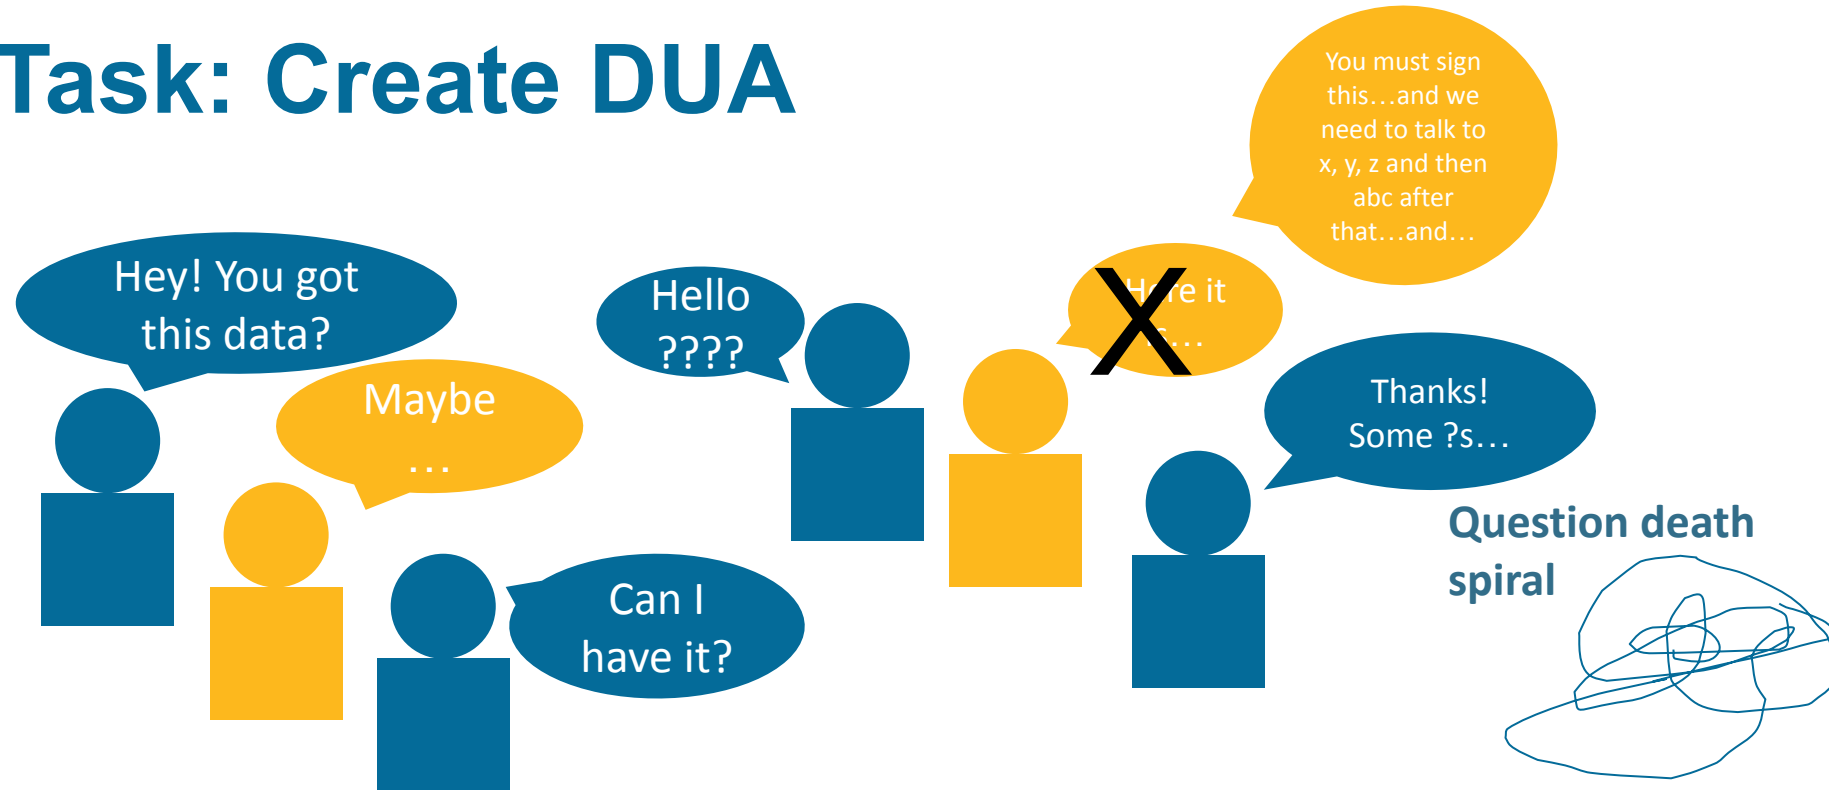

Emergencies

Why we need  
IDEA to make it  
happen

# Task: Create DUA

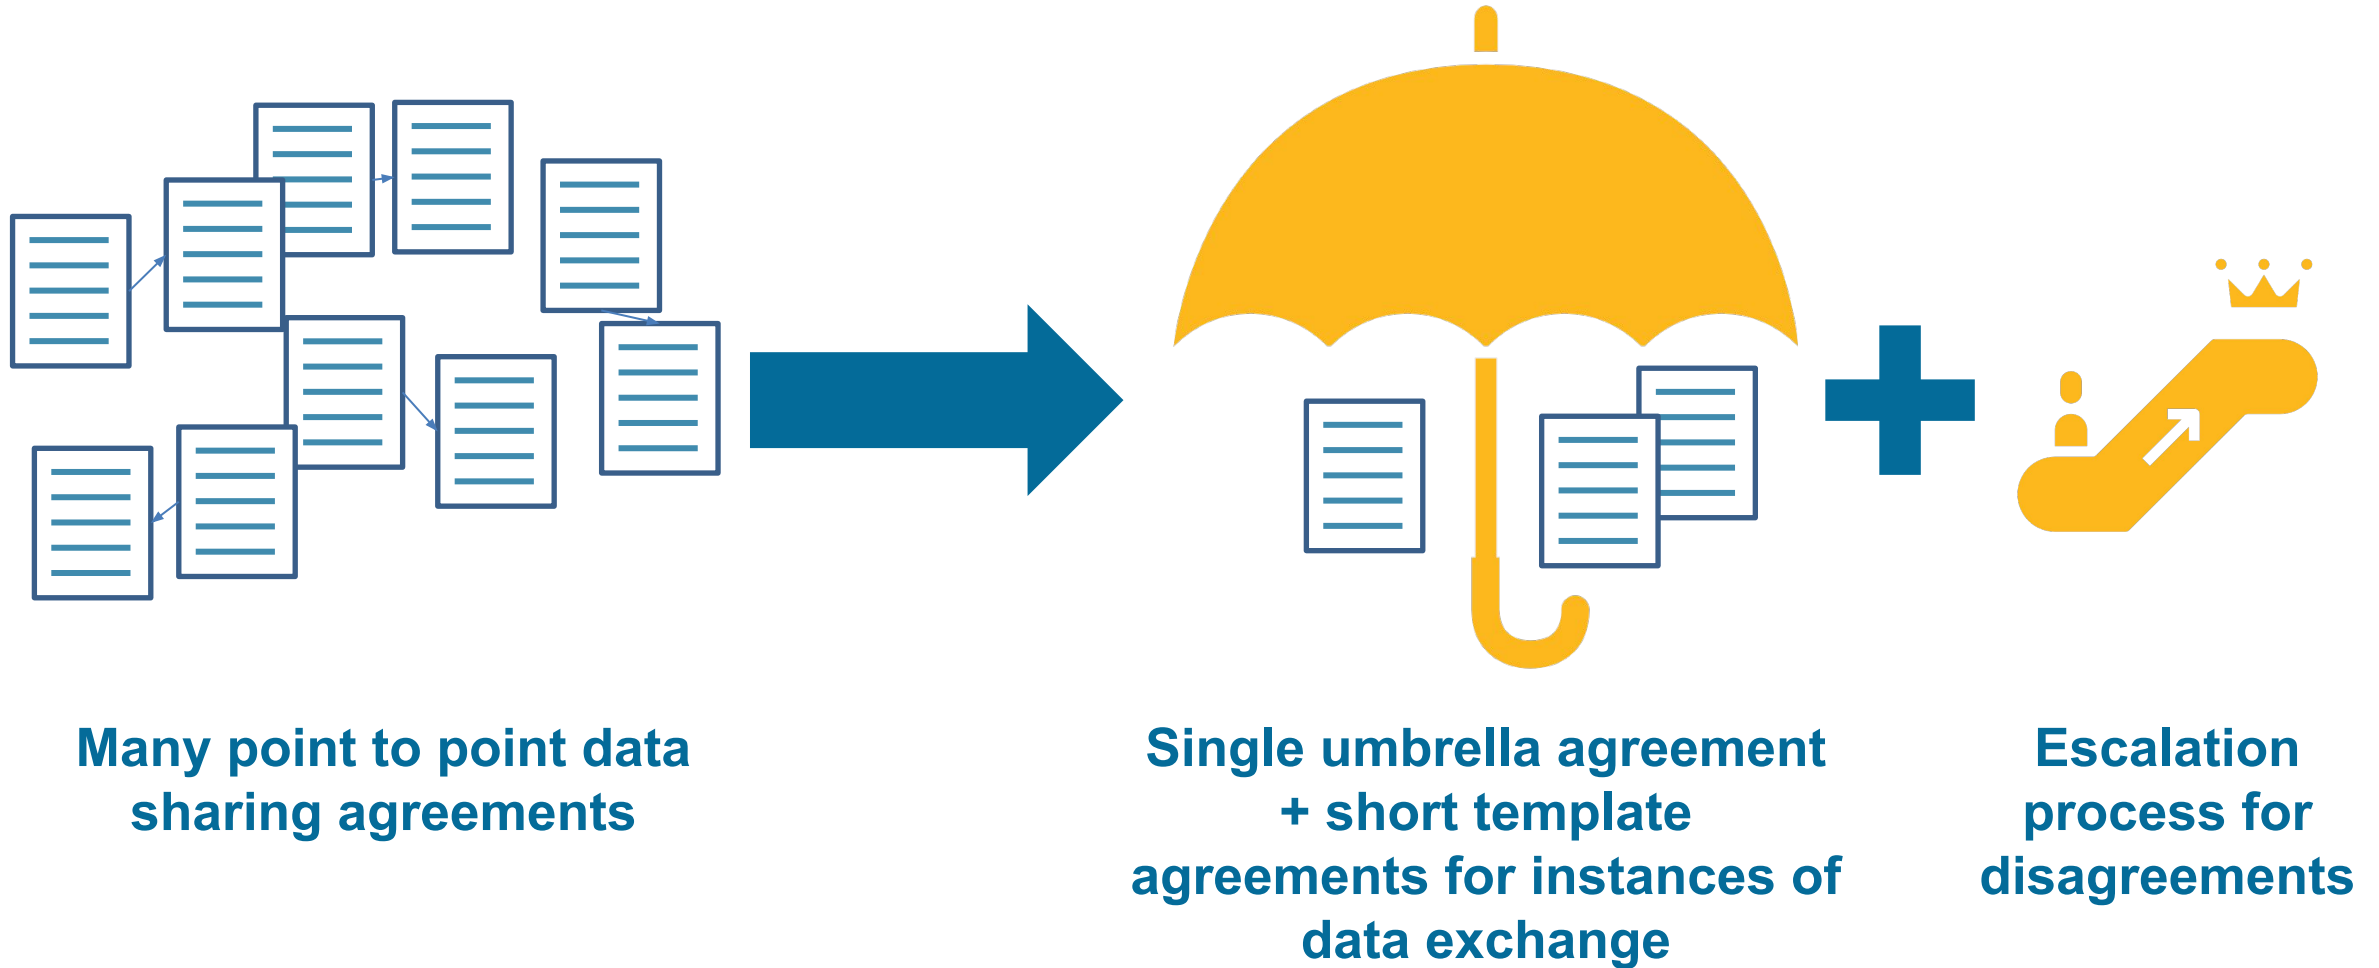

# Task: Renew DUA

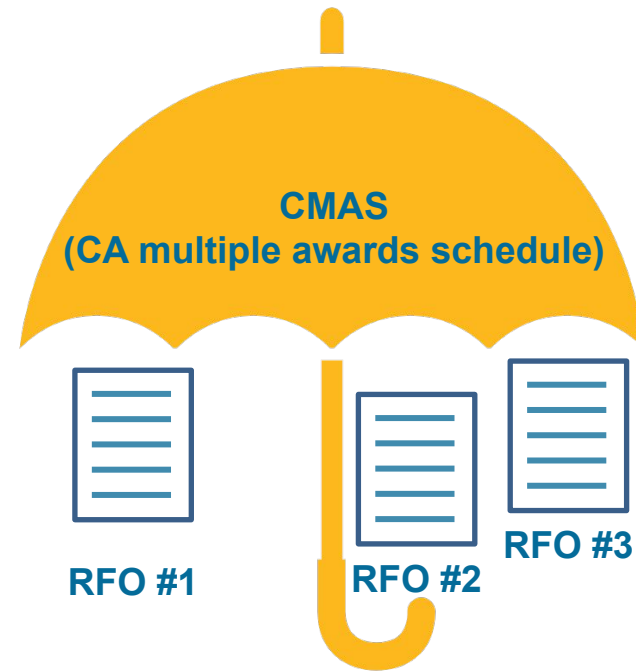

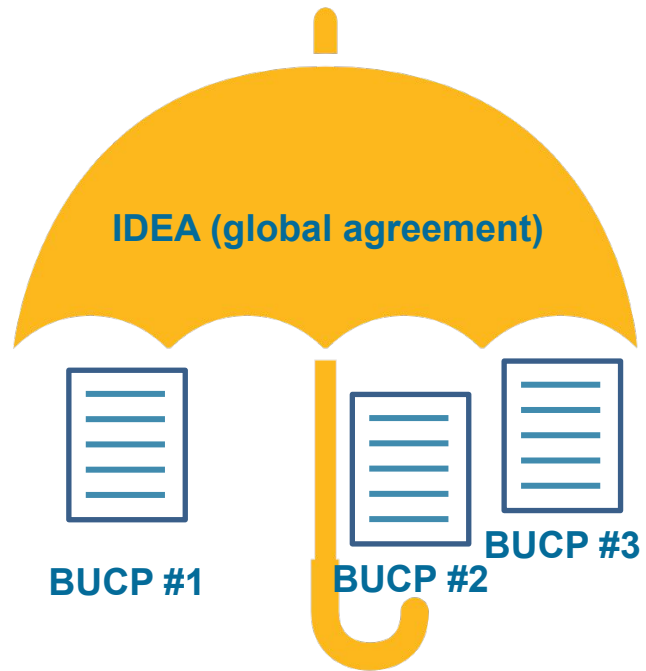

See previous

# How to break from the DUA DEATH SPIRAL!!!

# IDEA is CMAS for data sharing agreements

# Why adopt a single agreement

Fun fact: After CHHS adopted it completion time went from 2-3 years on average to 79 days!

# History of IDEA to date

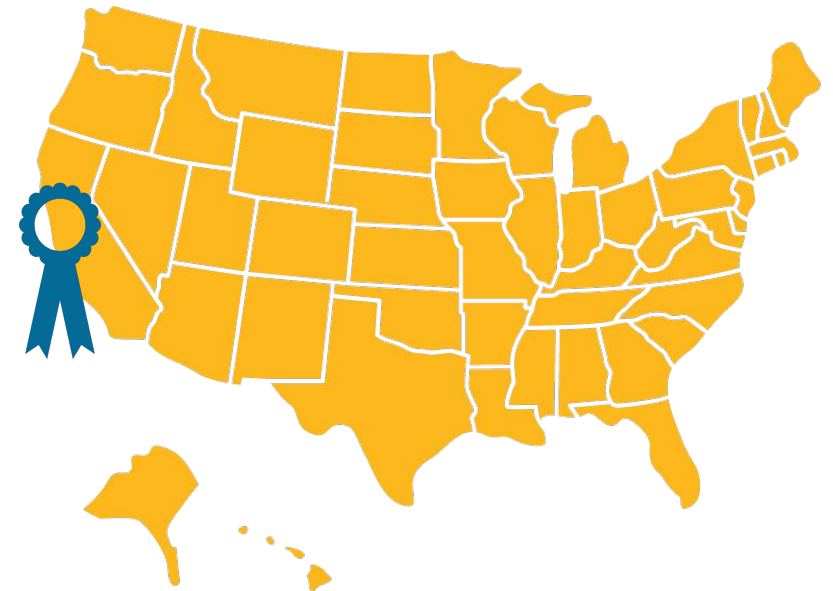

JULY 8, 2020 PRESS RELEASES, RFA NEWS

## Results for America Releases Blueprint for Delivering Better Results in State Government

**Washington, DC** – As part of an event co-hosted by the National Governors Association later today, Results for America is releasing the [Blueprint for Delivering Better Results in State Government](#), a practical guide for state governments to improve results by doing what

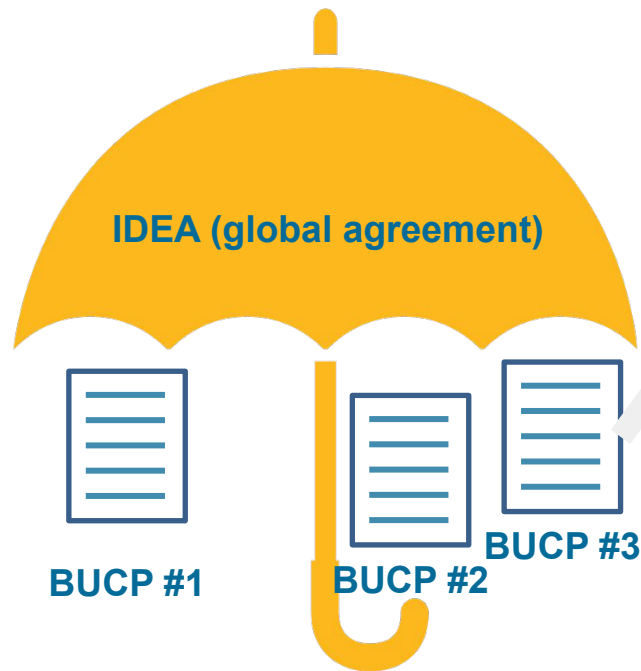

Expedite data sharing across and within agencies by creating formal, standardized, and easy to apply agreements that agencies can use to share data without risking privacy or security [Policy](#)

# The Details of IDEA

# Frees up time and energy to focus on the details of specific data exchanges

## Key questions to negotiate and document in the BUCP

- Purpose and intent of exchange (use case)
- Outputs from exchange
- Data elements needed
- Methods of exchange and destruction / return
- Legal authority
- Specialized security / privacy requirements
- Approvals by legal, privacy, program

# What IDEA does and does not do

## THIS

## Not THAT

|                                                                              |                                                                              |
|------------------------------------------------------------------------------|------------------------------------------------------------------------------|
| Single master agreement with template for individual data exchanges          | Not a bunch of independent point to point agreements                         |
| Establishes minimum security threshold consistent with SAM Chapter 3500      | Not security terms renegotiated for each agreement (and sometimes forgotten) |
| Focuses discussion on data to be exchanged (versus contract provisions)      | Not repetitive or duplicative conversations about terms                      |
| Requires allowable use per governing statute and regulation to be documented | Not about circumventing legal restrictions                                   |
| A tool to streamline and encourage appropriate data exchange                 | Not an abdication of department authority                                    |

# Other possible benefits

- Highlight areas of interpretation to disambiguate
  - (greater legal risk with inconsistent interpretation)
- Could flag unintended impacts of existing state statute or regulation
- Could surface need for new state rules
